1. Project Description

Name of Sub project:	KomariAgrarian Service Centre Modernization and Digitalization (Civil
----------------------	---

	Work) in Pottuvil DS Division in Ampara District.
Geographical coverage and location of the Subproject	<p>Province- Eastern Province District - Ampara DS Division- Pottuvil DSD ASC- Komari Agrarian Service Centre Located GN -Komari 2 (P/24) GN Division Location Map:</p>  <p>Source: Google Map Komari ASC</p>
Nature of the sub project:	It is mainly a Repairs of Komari A.S.C at Potuvil Divisional Secretariat Division in Ampara District.
Size/ scale/ Cost of the Sub Project	Rs. 17,528,557.16
Project implementing agency:	Department of Agrarian Development, Ampara which is the implementing agency. DAD with its network of officials based in the ASCs directly involved in implementing the subproject. Similarly, the staffs of the CSIAP based in national to divisional level will also involve in different stages of the implementation process appropriately. It is expected that all the service providing agencies such as Department of Agriculture, Department of Irrigation, Forest Department, Department of wildlife & Coconut development board etc. will also support to implement the subproject effectively. From the community side, FOs, agriculture committee associated with the ASCs, WFOs will also contribute to implement the project. Similarly, the farmers in general will support to implement the project by tolerating the difficulties that

	would be created during the construction period.
Specific objective and beneficiaries of the sub project:	<p>For the ASC to function in the CSIAP Project area as a sophisticated, modernized well-furnished and a resourceful one stop service center catering to present and future needs of farming community in order to increase their livelihood, income and agriculture productivity.</p> <p>From this project 3,716 males and 3,849 females will get the benefits directly or indirectly. Source - Pothuvil Statistical Hand book, 2018</p>
Sub Project Descriptions:	<p>Proposed sub project of repairs of Komari ASC include following activities,</p> <p><u>New intervention works: -</u></p> <ol style="list-style-type: none"> 1. Construction of Sales Centre 2. Construction of Vehicle Guarage <p><u>Repairing works: -</u></p> <ol style="list-style-type: none"> 1. Repair of Agrarian Service Centre 2. Repair of Fertilizer Store <p>The sub project will be implemented during the period from January 2020 to October 2020.</p>
Land Acquisition	The proposed subproject does not involve land acquisition.
Subproject Justification and Alternative Analysis	<ul style="list-style-type: none"> ✓ Reasons for the repair of the existing ASC (civil work) is majority of the respondent and the persons interviewed responded that the space available within the existing building was not adequate at all to provide a better service for the increased demand of the farmers. ✓ In many of the centres, there is no proper and spacious place with necessary equipment to conduct awareness programmes for the farmers. ✓ Sales centre is not available in the ASC, in Komari, main livelihood is farming, if we provide Sales centre that will help to farmers. ✓ Right side of the ASC adequate space observed for construction of vehicle guarage, no any vehicle park identified in the Agrarian Service Centre. ✓ One fertilizer store existing in the ASC, existing entrance of the store has not enough space for vehicle movement. <p>Existing Fertilizer Store in the ASC</p>

Existing Doors of the fertilizer store - small space for entrance, the space not enough for vehicular movement and fertilizer transport.

General Profile of the Community

Under the Komari ASC, there are 05 GND. The total numbers of families are 1,717 and total number of farm families 453. Women headed farm families are 307.

Table No: 01 General Profile of the Community

Nature of the land ownership for the subproject
Land of the existing ASC owned by the DAD. ASC has adequate and underutilized lands for the proposed construction. Therefore, the proposed civil work will not have any risks from having to obtain additional land. Therefore, the subproject activities can be implemented without causing any displacement or impact to people living adjacent to the ASC. Issues in resettlement will not arise.

Land ownership pattern of people in the area (Ex: squatters, titleholders, tenants)?
 Permit & Deed lands - 249 AC
 Non-Permit Lands - 2,223 AC
 Major land extent - Nil
 Minor land extent - 1,904Ac
 Rainfed land extent -568 Ac
 Total extent - 2,472 Ac 1 root 9 perch
 Source:ASC - Komari, 2019

Gender Issues
Following is a description of the gender issues are concerning the communities in the impact area of the Komari ASC:
 ▪ Komari ASC located in rural area and long distance from Ampara

	<p>town. Farming communities are faced more difficulties for transports and other needs.</p> <ul style="list-style-type: none"> ▪ In the ASC Division men and women farmers are actively participated in every farming activities and women farmers actively involved in land preparation, seeding, planting, harvesting and preparation for marketing and also contribute to livestock management. ▪ In Farmer Organizations males are dominated in decision making process and less opportunity for participants and low - level female representation in rural level farmer organizations. ▪ WFO also actively participated in paddy farming activities and they do not have much opportunity to benefit from extension services. ▪ Women headed families are mostly involved in Home garden activities and their fields are damaged by wild animals and they also loss their family income and faced much difficulties such as poverty, malnutrition, mental stress etc. ▪ Female farmers do not have land ownership which restrict to access the water facilities and fertilizer subsidies. ▪ In the farming activity allocated payment of wages for female labour is much less than the male labour. However female labours are hired as unskilled labours for agricultural activities without proper allocated wages. ▪ Most of the women headed households are living in rural areas and restricted for gathering the knowledge in technical business skills and access to markets.
Social Capital - community-based organizations	<p>The following community-based organization identified in Komari ASC Division.</p> <ul style="list-style-type: none"> - Farmer Organization (FO): F:O-08 - Woman rural development society (WRDS) - 01 - RDS - 02 - Kiramasakthi - 02 - SiThaMu - 04
On-going Development Projects	There are no development projects being implemented in the project area.
Frequenting Visitors	Outside peoples coming forcollecting paddy seeds and ground nut.

	Farmers(Men and Women) visit to ASC for getting fertilizer and subsidies.
Social Impacts Positive Impacts	<ul style="list-style-type: none"> • This subproject will benefit the local population of the area, especially for farming communities. • Storage facilities for seed paddy, fertilizers etc. also limited. Higher number of farmers visiting to this ASC for get fertilizer but in existing fertilizer store has not enough space for store high number of fertilizers, if we go for Repairing of the existing fertilizer store that will lead to increase of agriculture production in Komari ASC division. • ASC will also serve as a place for ASC staff and community to interact, to share knowledge and create awareness about project. Therefore, the ASC will enhance community participation and relationships between ASC staff and farmers. • The sub project will provide high-quality advisory services for farmers and agribusinesses in Komari. • Once the project is complete, benefits will start to flow almost immediately with the onset of rain and the long term through enhanced resilience. • The two communities interacting with each other, government officers and contractors in the process of jointly conducting social auditing, participating in irrigation water management, training and extension, business development and marketing will reap benefits in the form of valuing working together despite differences along with increased knowledge and awareness. • Overall, the completed project will bring about poverty deduction, inclusive development and shared prosperity. • CSIAP staffs and community people share their knowledge and make awareness of this project through this community participation also enhanced. Staff of ASC division and farmer's relationship will enhance.
Negative Impacts	<ul style="list-style-type: none"> • During office hours noise and dust come from the construction work that will disturb to officers and farmers. Materials storage and machinery parking somewhere near the site will also cause some disturbances to the community. • A labour camp may be established and there could be impacts from labour influx-however, will be very minimum considering that only

	<p>limited number of labourers (approximately 5) may come from outside.</p> <ul style="list-style-type: none"> • There are no any sensitive areas located near to the construction site. • When constructions are carried around schools, preschools maximum precautions are required to ensure the safety of children. Due to curiosity children may try to enter into the worksites and look through the manholes or meddle with the equipment etc.
Mitigation Measures	<ul style="list-style-type: none"> • The social issues in any infrastructure developments project are common and cannot be avoided. Also, it is important to note that the majority of social issues are emerged and aggravated due to absence of realistic methods of constructions and systematic approach. • For example, contractor will be required to do water sprinkling to minimize impacts from dust and carry out noise generating work during day time while ensuring noise pollution is kept to the minimum. Public access to the site to be prohibited or controlled via adequate fencing and signage in order to avoid risk to the public. • There should be special arrangements at worksites closer to schools at the time of starting and closing of preschool and schools. • All contractors will be required to develop and implement written labour management procedures, including procedures to establish and maintain a safe working environment. • Adequate care and measures will be taken to avoid any violation of use of labour accidents, or disputes with local communities due to use of non-local labour force used for constructions, risks associated with influx of non-local workers. • The contractors would be encouraged to use as much as possible locally hired labour. • Since the civil construction works will be carried out using proper construction practices and there will be no adverse impacts on the properties, residential and other structures of the community located at a distance from the site. However, there will be some temporary impacts due to the project implementation in respect of which mitigation measures are proposed. • The contractor will also be required to employ an environmental and social officer to address any issues that may crop up during

	<p>project implementation. All contractors will be required to develop and implement a code of conduct for labourers, including procedures to establish and maintain a safe working environment.</p> <ul style="list-style-type: none"> • The staff and workers will be given an orientation on appropriate behaviours to ensure no disturbance to the community life and officers of the ASC. Adequate care and measures will be taken to avoid any violation of use of labour, accidents, or disputes with local communities and other risks associated with influx of non-local workers. • Through the relevant officials the FOs will request the contractor for employing local labour to the maximum extent possible and hire village vehicles for material transport. Any individual requests for service by the contractor will be conveyed to the authorities and will be attended to without compromising the project activities and social and environmental concerns. • The mitigation measures including the appointment of an environmental and social officer, will be included in the specifications for the main contract, and monitored by the project management to ensure compliance. • Grievance redress mechanism and Social Audit Committees will be established to allow ASC staff to raise any complaints and provide feedback regards construction activities.

2. Social Screening Checklist				
Screening/ assessment questions Project type	Yes	No	Low/ medi um/ major impac ts	Description/ Details
Background				
1. Will the subproject/ intervention include new physical construction work? (Attach a copy of technical design) and what is extent of the works - small, medium, large?	√		Low	<p>Construction of sales center.</p> <p>Construction of Vehicle Guarage.</p> <p>This is medium scale construction.</p>

2. Does the subproject/ intervention include upgrading or rehabilitation of existing physical facilities? (Attach a copy of technical design) and what is extent of the works - small, medium, large ?	√		Low	Repair of Agrarian Service Center. Repair of Fertilizer store These are small sale rehabilitation.
Project site and land acquisition and Livelihood Related Impacts				
3. Is the site chosen for this work free from encumbrances (Ex: squatters, crops, trees, houses, other structures walls etc)	√		Low	
4. Is the site chosen for this work in possession of the implementing agency?	√			Department of Agrarian Development, Ampara which is the implementing agency.
5. If the land is owned by other government agencies, has action been taken to transfer these lands to CSIAP managing entity? (Attach evidence of transfer)		√		The identified land belongs to Agrarian Department- Ampara.
6. Does the sub project intervention require acquisition of private land?		√		
7. If the land parcel has to be acquired, is the actual plot size and ownership status known? (Mention the details)				Not Applicable
8. If the site is privately owned, can this land be purchased through negotiated settlement?				Not Applicable
9. If any land required for the work is privately owned, are these land owners willing to voluntarily donate the required land for the CSIAP rehabilitation / development? (if yes attach the concern letter)				Not Applicable
10. Will the affected land/ structure owners likely to lose less than 10% of their land of structures area?				Not Applicable
11. If so, are these land or structure owners willing to voluntarily donate the required land for this sub project?				Not Applicable
12. If the land owners are willing to donate the				Not Applicable

land, do they lose more than 10% of their land / structure in this location due to of donation?				
13. Are there any previous land acquisition where the identified land has already been acquired?		√		
14. Is the land for material mobilization vehicular movement, transport for the civil work available within the identified worksite or right way?	√			Land for the material mobilization vehicular movement and transport for the civil work are available. Therefore, lack of parking space will not be serious issue in the subproject area.
Project impacts				
15. Is the project/ intervention likely to cause any permanent damage to or loss of housing, other assets, resources use?		√		
16.If yes, are these damages likely to be full or partial (Ex: entire structure having to be demolished versus part of the structures being damaged?)				Not Applicable
17. Will there be loss of / damage to agricultural lands, standing crops, trees due to acquisition of lands, construction of facilities etc?		√	Low	
18. Will there be any permanent or temporary loss of income and livelihoods because of the civil works? If so for what period? Also, please specify whether it is likely to be temporary or permanent.		√		
19. Have these people/ businesses who may suffer temporary or permanent loss of incomes or livelihoods been surveyed and identified for payment of any financial assistance?				Not Applicable
20. Will there be any adverse impacts (inconvenience/ restriction of access, damage to properties) on the people/ communities due		√		But during working hours there will be some disturbances to

to construction related transport/ other activities etc?				staff i.e. from noise and dust.
21. Will there be any impacts on cultural, community properties or facilities?		√		
22. Will the project cause any other temporary or permanent impacts? Pls describe		√		
Livelihoods related impacts				
23. is there any loss of crops, assets, business etc.		√		
24. Are there any non-titled people (squatters) who are living/ or doing business who may be partially or fully affected because of the civil works?		√		
25. Have measures been planned to mitigate temporary impacts including ease of access? Give details?	√			Temporary impacts will be addressed/mitigated according to the SIMP.
Resettlement impacts				
26. Does this project involve resettlement of any person? if yes, give details		√		
27. Is there any physical displacement of persons due to project construction?		√		
28. Does this project cause any temporary relocation of people during construction?		√		
29. Is there any economic displacement (possibility to move out, close of business/ commercial/ livelihood activities of persons) during construction?		√		
30. Will people permanently or temporarily lose access to facilities, services, or natural resources? e.g firewood collection and other rural livelihood sources linked to forests and government land		√		
31. Are there any vulnerable people/ groups	√			Vulnerable

(poorest/ women headed households/ elderly families, single parents, families with disable persons) living in the proposed locations or affected / benefitted by the project intervention? (give the number)				<p>people/groups will not be negatively affected due to the civil works.</p> <p>They will be benefited directly or indirectly. The details are below:</p> <p>450Samurdhi beneficiaries.</p> <p>Woman headed - 149families. Widow headed - 147 families. Disable headed - 57persons.</p> <p>Source -Pothuvil Divisional Statistical hand Book, 2018.</p>
32. Are there any indigenous people living in the proposed locations or affected/ benefitted by the project intervention? (give the number)		√		
Impacts from labor influx				
33. Will the project potentially involve an influx of workers to the project location?	√			
34. Will the influx be considered significant for the local community?	√			
35. How many workers will be needed for the sub project, with what skill set, and for what period?	√			Approximately 12 skilled workers and 25 unskilled workers are needed for 3-4 months.
36. Can the project hire workers from the local workforce? And what is the size and skill level of the existing local workforce?	√			Skilledlabors- 632 M-485, F-147 Unskilled labors - 1,406 M -861, F-545

				Source - Divisional Statistical Hand Book, Potuvil- 2018
37. If the skill level of the local workforce does not match the needs of the project, can they be trained within a reasonable timeframe to meet project requirements?	√			Workforce is available at the local community and contractor will bring his workforce if needed.
38. Will there be workers brought in from outside?	√			
39.How will the workers be accommodated? Will they commute or reside on site? If so, what size of camp will be required?		√		They will find a house for rent.
40. Based on the socio-economic, cultural, religious and demographic qualities of the local community and the incoming workers, is there a possibility that their presence or interaction with the local community could create adverse impacts?		√		Hence, majority of the incoming workers would be from similar socio-economic, cultural, religious or demographic background.
41. Will the incoming workers use or create competition for these resources?		√		
42.What is the expected duration of the incoming workers' presence in the community? Or frequency and extent of contact between the local community and outsiders?				Approximately 3-4 months.
43.Will the incoming workers be from a similar socio economic, cultural, religious or demographic background?	√			Most Probably similar.
44. Given the characteristics of the local community, are there any adverse impacts that may be anticipated?		√		The local community is Tamil speaking and majority of them are Tamils. So same language speaker will be preferable for minimized unwanted social issues.

45. Is the project located in a rural or remote area?	√			The identified project site is located in a rural area.
46. Is the project located / being carried out in an area that is not usually frequented by outsiders?	√			Men and women visit to the ASC for getting fertilizer and subsidies.
47. Are there sensitive social conditions that need to be considered?		√		
Community participation				
48. Has the project received community consent and support?	√			1 IEC Meting conducted. 1 CBO meeting conducted.
49. Are there any CBOs or other that exist in the selected locations?	√			Farmer org -08 SiThaMu -04, Source -ASC, Komari- 2019
50. Will the project mobilize these CBOs for GRM/ Social Audit/ etc activities?	√			Grievance Redressal Committee will be established to address/resolve issues.
51. If CBOs are involved, do these organizations have prior experiences in GRM/ Social Audit/ etc practices?		√		The project has to be trained the people.
52. Do the CBOs identified for the CSIAP activities transparent and accountable and free from any form of corruption/ abuse?	√			
53. Will the project expect any counterpart contribution from the beneficiary households? (if yes, what is the expected contribution)	√			Community can support with shramadana activities 50 - 100 members from each FO can contribute 2 to 3 hours per day shramadana activities. (e.g. unskilled voluntary work).

Gender Based Violence				
54. Is the subproject in an area of the district with a humanitarian or emergency situation?		√		
55. Undertaken consultations with women's groups?	√			In the ASC Division arranged one community consultant meeting, both men and women farmers were participated and no arranged separate meeting with women farmers. one discussion conducted with ASC staffs.
56. Issues related to GBV and GBV-related concerns about the project have arisen in the community engagement discussions?		√		Gender based issues or violence not identified and not recorded during the community consultant meeting and discussion.
57. Are military or paid security forces being contracted as part of the project? (Having military or paid security forces contracted as part of a project can increase the risk of GBV.)		√		Contract with registered Contractors.
58. Is the project district in lowest poverty quartile of country? (Regions in the lowest poverty quartile of a country may be underserved and the most vulnerable to neglect)	√			National Poverty line value of Sri Lanka Rs.4,939.00 expenditure for person per month in Ampara District Rs. 5,030.00. (Department of census & Statistics - Sri Lanka December,2019) In KomariASC

				<p>under the Pottuvil DS Division.</p> <p>Income level (per month per family)</p> <ul style="list-style-type: none"> - 1,182 families income come under below Rs. 10,000.00. - 535 families income come under above Rs.10, 000.00 <p>(Income details annexed)</p> <ul style="list-style-type: none"> - 775 families are Samurdhi beneficiaries (Source - Divisional Resource profile, Potuvil - 2018)
59. Is the subproject in hard-to-supervise areas? (Lower risk is easily accessed project areas. Higher risk is hard-to-supervise areas)		√		The project area located in rural area therefore, transport facilities are very low.
60. Is the subproject construction near school route or other pedestrian access that women and girls use for their daily activities?		√		<p>Komari ASC come to under the Potuvilpradesiya Sabah</p> <p>Schools -04</p> <p>Religious Places</p> <p>Hindu Temples - 11</p> <p>Church - 05</p> <p>Mosque - 0</p> <p>Government offices</p> <ul style="list-style-type: none"> • Agrarian Service Centre • Medical clinic center - 01 • Agriculture Office - 01

				<ul style="list-style-type: none"> • Post office - 01 Shops - 04 Hospital - 01
61. Will the subproject be able to monitor implementation across the full span (both in terms of geographic spread and duration) of the work?	√			Transport facilities low in this area and faced difficulties by wild animals.
62. Will female workers be in close proximity to male workers with limited supervision?	√			In the ASC modernization project female workers are like to support the "Shramadana" work and no any issues in working together with male workers in the limited supervision. WFO and WRDS committed to time for "Shramadana" work.

3. Estimate of Specific Impacts and Information on Affected Persons

Estimates of specific impacts	Number/ Amount/ Ha
- Private land required (Sq. m)	0
- Total number of households affected	0
- Number of individuals losing more than 10% of land area	0
- Government land required	Yes (and Available)
- Number of shops affected	0
- Number of utilities affected	0
- Number of workers to be brought from outside	12 skilled laborers are needed. (Approximate number)

4. Decision on Categorization

Decision on Categorization, after reviewing the answers above, it is determined that the sub project will have:	
High/ substantial impacts	
Moderate impacts	
Low/ no impacts	√

5. Impact Categorization

Conclusion and Screening Decision (to be filled by the PMU)

Social impacts of the proposed sub project

- No Impacts: there is no land acquisition because these are permit lands and no loss of livelihoods if the works are completed during the dry/off season, Social Screening Report (SSR), Social Impact Management Plan (SIMP) [required if civil works involved]
...✓.....
- Minor Impacts: Less than 200 individuals affected; no physical displacement; & affected persons lose less than 10% of their productive assets, SSR, Abbreviated Resettlement Action Policy (ARAP), SIMP.....Temporary impacts only. SSR with SMP submitted.....
- Significant Impacts: More than 200 individuals affected; cause physical displacement; affected persons lose more than 10% of productive assets, SSR, SIA, census survey, RAP with R&R assistance & income restoration measures.....

7. Social Management Plan for ASC Modernization and Digitalization (Civil Work)

Social Impact Mitigation Plan for the ASC modernization and Digitalization (Civil Work) Subproject				
Issues/ Impacts and risks	Mitigation Measures	Institutional Responsibility		Mitigation Cost
		Implementation	Supervision / Monitoring	
General (for all types of risks, issues and disturbances)	<ul style="list-style-type: none"> A GRM will be established to receive and resolve complaints/grievances related to disturbances caused by construction including GBV related issues. Awareness will be created on the GRM among community and ACS staff and will publicly display the contact details to report grievances. Awareness will be created among community on risks/issues including GBV issues due to labour influx arising from construction activities and safety/mitigation measures that will be in place. 	Social/Environment safeguard officer - ACS/CSIAP	PMU	Included in sub project's safeguards budget.
Disturbances due to heavy machinery movement & temporary use of land for material storage and parking.	<ul style="list-style-type: none"> An officer will be appointed to implement & monitor social/environment safeguards mitigations measures during construction. Community and ACS staff will be informed of construction activities/schedule, and mitigation measures that will be in place. <p>Consultation with ACS staff and community will</p>	Contractor	Social/Environment safeguard officer - ACS/CSIAP	Included in construction cost.

	<p>be conducted to identify land for material storage, camp setup, equipment parking and routes to transport material that cause minimum disturbances to community & ACS activities.</p> <p>If there are damages caused to local roads and other utilities during construction, contractor shall attend to the repairs/rectification of the damages.</p>			
Construction related disturbances from noise & dust etc.	<ul style="list-style-type: none"> Dust barriers will be installed surrounding the construction. Water sprinkling will be done to minimize impacts from dust. Dust masks to be provided to all laborers for the use at required times. The construction will be carried out in a manner to minimize noise pollution. The construction works with heavy sound should will be timed to avoid office working time period. 	Contractor	Social/Environment safeguard officer - ACS/CSIAP	Included in construction cost.
Labour Influx related issues (e.g. GBV)	<ul style="list-style-type: none"> Local labour will be hired where possible - Contractor will give priority towomen when hiring. Worker Code of Conduct will be included as part of the employment contract - this should define workers' commitment in attitudes and behaviour to preventing, combating and responding GBV. Contractors will implement robust measures to 	Contractor	Social/Environment safeguard officer - ACS/CSIAP	Included in construction cost.

	prevent sexual harassment/GBV including training of workforce and sanctions for non-compliance (e.g. termination).			
Public/ occupational safety Hazards, and on impacts on environment.	<ul style="list-style-type: none"> • Public access to the site will be prohibited or controlled via adequate fencing and signage in order to avoid risk to the public. • Contractors shall take precautions to minimize mosquito breeding, where the pit fills with water. • Environment Management Plan will provide more details regards measures to prevent/mitigate impacts to the environment including pollution, deforestation, soil erosion and management of solid waste. 	Contractor	Social/Environment safeguard officer - ACS/CSIAP	Included in construction cost.
